

Big Mac and fries!

The amount of this litter from one outlet just goes to prove, IN ONE WINDOW AND OUT THE OTHER, when is something going to be done. Don't take my word for it, ask the WCBC Litter Pickers, real good guys and they know what is going on because they collect tons of it.

Young people with cases of booze bought from Tesco, please note the time outside our premisses. This kind of behaviour fuelled by TESCO is giving our pub a bad name, as WCBC Licencing became aware of in October.

The Tesco Land Fill Site at the centre of our community, this car park is surrounded by bushes that are infested with rubbish that needs removing before it encourages further pest control measures to be implemented.

Tesco sales again left on our doorstep, when is something going to be done about this, if we were responsible for the same, our licence would be removed. So, when is WCBC Licencing Department going to do something about this? We are more than willing to help.

COVID 19 Containment measures may require pubs to close and people to lose their jobs but what is being done about all the home bars that are popping up supplied by the supermarkets.

The licencing system in the UK is out of control and needs to be brought back under control and this does not mean police harassment for licenced premises.

We need to work together and get this sorted or all local business will be destroyed.

This advert was in the Wrexham Leader mid-October and is not a one-off advert.

Shropshire Star 15th October 2020

Pub group Marston's to axe 2,000 jobs

<https://www.shropshirestar.com/news/business/2020/10/15/pub-group-marstons-to-axe-2000-jobs/>

The number of bottles and cans we collect is varied and wide-ranging emanating from the Tesco Store, however some even come with their name on them! If the same volume of our beer glasses turned up in their car park our licence would be removed, and we would most likely face a serious fine for littering. So, what is being done. We have previously complained to the Cefn Community Council before the Coronavirus Pandemic, but nothing seems to be done and CCC are not interested. So, we now ask WCBC Licencing Department to do something please.

Please note ALL OUR WASTE is dealt with responsibly and the little waste we do produce is recycled in the correct stream without causing an environmental problem. We also recycle all other waste we collect on our litter picks around our pub and elsewhere in our community at the centre of the Pontcysyllte World Heritage Site. In fact, because of our Environmental Policy we achieve the impossible, we recycle 110%, 100% of our own limited waste with an estimated 10% of others and the majority of that emanating from Tesco.

Please note in the next November ASB Report we will be following up on this story to show you where some of these cans are ending up, the Foster beer can trail!

As publicans we know Foster's Larger is one of the most popular drinks we sell, and obviously Tesco know the same as they put it out by the pallet load in their store. Unfortunately though they do not collect the empties like we do at the Holly Bush Inn just up the road from Tesco and so these cans end up all over the place and are relatively easy to spot because of their colouring. This is just another environmental problem waiting to happen and why we propose the [PKC Group & the Circular Economy](#).

A final beer in our pub before we must close again for the second time in 2020 because of the COVID 19 regulations. Interestingly enough the beer glasses on display here are washed in a glass washer at over 60°C high enough to kill all Coronavirus bacteria along with all furniture and surfaces daily cleaned with bleach and disinfectant, and yet we have to close. How many supermarkets and retail chains conduct such rigorous cleaning regimes as we do daily?

Furthermore, we note in the short period we could reopen that some pubs were closed again (notices served) because some one had been there that had tested positive for COVID 19. Now pubs generally see in the hundreds of people in a week depending on how well they are doing and so the odds of a COVID 19 case are low. However most large supermarkets number in the thousands per week and in the case of our local TESCO the average is around 10,000. Therefore, there must be COVID 19 Positive cases going through the supermarkets on a daily basis but none are ever closed.

So, we ask what is going on?

At 1830, half an hour after we have had to close for a second time in 2020 because of the Coronavirus I buy an essential (?) item out of guess where? This whole pandemic seems to be geared up to clearing the way for supermarkets to ruin all our local trade a grossly unfair way to go.

During the second lockdown and booze is unrestricted at roadside filling stations! Who said the Drink Driving Problem was over?

Aldi at the Ruabon Roundabout along with the filling station is stacked out with booze for the Lockdown, this is a farse and is just grossly out of order. Can not WCBC Licencing do something about this, or is just going to be pick on the usual suspects when we are allowed to reopen again?
