

A collection of news stories affecting our community during 2023. As of 2020 we noted our community will be liable to a higher tax burden for HS2 than it would cost to build a much-needed railway station at the centre of our community and the Pontcysyllte WHS. Therefore, we object to HS2, or as we call it, "The Welsh Bypass". Furthermore, our railway line (Marchers) offers a viable alternative to the main West Coast Line as the former Wrexham & Shropshire Service proved before closure in 2010. We ask, why not use this to alleviate congestion on the main West Coastline, which would literally save billions of pounds.

With the accepted (2021) cost of HS2 at £106 billion pounds and maybe more, this confirms the forecast of £1500 taxation for very man, woman and child in the UK. This means that our community numbering 10,000 people will contribute £15 million pounds. A first-rate railway station for Cefn Mawr will only cost around £12 million pounds.

Wrexham named UK city with second highest CO2 per 10k people. Data has suggested that the UK produced over 400 million tonnes of CO2 in 2021, which was a 6.3% increase on the previous year. According to the data Wrexham was named the UK city with the second highest CO2 emissions per population following Newport.

<https://www.leaderlive.co.uk/news/23229831.wrexham-named-uk-city-second-highest-co2-per-10k-people/>

## UK Cities With The Highest CO2 Emissions By Population

It is no surprise that the UK cities with larger populations are the ones producing more CO2, but how much does population affect the ranking? As well as looking at which cities have the highest overall CO2 emissions, we have also normalised the CO2 emissions for each city against the respective population.

<https://www.utilitybidder.co.uk/compare-business-energy/co2-producing-uk-cities/>
